

VOC Regulations for Adhesives and Sealants Common Questions and Answers:

Q. What are VOC's?

A. VOC stands for **VOLATILE ORGANIC COMPOUNDS**. The main purpose of the VOC Regulations is to reduce the formation of ozone (smog). Several states have adopted rules to regulate the VOC content of all types of consumer products including adhesives and sealants.

Q. Which states are impacted?

A. Adoption of VOC regulations – and dates these regulations go into effect – varies by state

NOTE: VOC regulations have been newly adopted for the Red States, and announced for the Yellow States. Review your product listings for Henkel products which are impacted, and transition to alternative Henkel products as suggested.

**VOC Regulations Newly Adopted
Effective Date January 1, 2009:**

Connecticut, Ohio, Massachusetts

**VOC Regulations Announced
Effective Dates Pending:**

Wisconsin, Illinois, Indiana, Rhode Island, Vermont

VOC Regulations Currently in Effect:

California, Delaware, Maine, Pennsylvania, New York, New Jersey, *Virginia, Maryland, Washington DC, Michigan, New Hampshire

*Northern Virginia (Arlington, Fairfax, Loudon, Prince William, Spotsylvania and Stafford counties. The cities of Arlington, Fairfax, Falls Church, Manassas, Manassas Park and Fredericksburg).

Q. What size of products are impacted?

A. The new regulations apply to consumer adhesives and sealants sold in packages of 16 fluid ounces or less, except for aerosol adhesives which are considered consumer products regardless of size. Larger sizes such as quart cartridges are not regulated at this time and are ok to continue to sell, except in certain areas of California, where different regulations apply.

Q. Which products are impacted by these new regulations?

A. Most solvent-based products in small containers are impacted. A complete list of Henkel Brand products is attached.

Q. What should I do if I am currently stocking products which are impacted by the new regulations?

A. Take note of the effective date for your state. **Any product manufactured prior to that stated effective date** has unlimited sell-through, except California which has 3 year sell-through from each effective date for product sizes less than 16 oz.
